

K-Love was there for our family when we needed it. My Daughter was in elementary school and wanted to listen to the music her friends listened to. It was awful. I remember one song that was about mammals "doing it". It implied that humans are mammals and so humans should do it like the other mammals: often and with whoever. This wasn't how I wanted my sixth grader to act. Fortunately one of her friends said "Let's listen to K-love". It was like a gift from heaven. My daughter loved k-love. I'm so glad it was there for us.
